

PC POS SOLUTIONS

*Flexible Retail POS
that is Affordable and Connected*

- Chowiz PC POS solution is designed from the ground up with the real-world needs of the retail sector in mind.

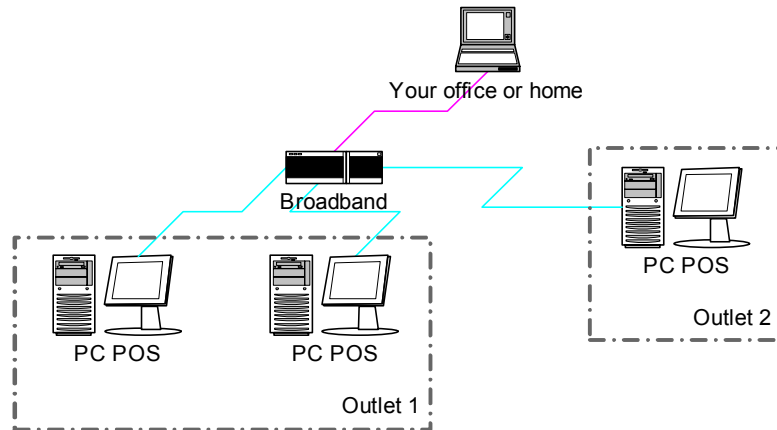

We combined the standard POS features with the benefits of the Internet that brings about a new concept that will make you connected to the POS wherever you are.

Other than the inherent conveniences of a PC POS, the very unique feature of Chowiz PC POS is the ability to integrate ezlink payment as one of the tendering medium.

Advantages

- **A PC (Personal Computer) platform** that runs on the popular operating system Windows 2000 or Windows XP. You can be rest assured that the connected devices would be well-supported.
- **The PC may serve as a normal computer** for your other retail needs like finding information of products from the Internet and communicating via email. This will undoubtedly save on cost of purchasing a separate computer. Of course, the PC POS may be configured to disallow cashier from using it for purposes other a POS if needed.
- **Sales report available online** This tremendously useful feature translates into greater control and flexibility when you can view the sales online from another location. You would be able to know at one glance how are the sales in different outlets from your office or even your home.

- **Affordability** Chowiz PC POS is able to compete in the market with a much more affordable price than its competitors because of our relationship with our hardware vendors. The quality of our products is never compromised and we always source for the value-for-money devices and parts that have a good balance between price and quality. And this relentless search gives a price that is affordable and unbeatable.
- **Pay with ezlink** Chowiz offers POS with ezlink payment mode that very few vendors can provide. This is the competitive edge that will win over your customers from your competitors that do not offer such ezlink payment. ezlink card is in the hand of almost every Singaporean so do not miss out on this group of consumers!
- **We offer system integration for your business** so that you need only do what you are best at – build up your business. Chowiz wants to make sure your business gain maximum benefit from our PC POS by ensuring that PC POS is tightly integrated into your business. You may want to connect up all your shops via Internet connection and have surveillance system covers all the outlets – talk to us.
